Batch Analysis

1. Import ISBN &/or OCLC# using an ILS report (e.g. 0 or low use report as a simple delimited file)
3. Review GDM data: Free full text, price, accepted by Better World Books, regional holdings, & more.
4. Sort by values, make decisions, then…
5. Batch remove from OCLC using Connexion (or convert records for full-text holdings?)

Possible Uses:
- Book and journal overlap analysis
- Identifying works to digitize
- Identifying materials for special collections
Improvements at the Local Level

The good news:

- Should be completed by January, 2015
- IDS libraries will be linked through an IDS Consortial Group
- Will be freely available to all IDS libraries
- Bill Jones will be handling the CSS and HTML for GDM Online

The bad news:

- Original contractor doubled agreed upon price
- Spent time finding a new contractor
- Behind schedule but catching up (only backend works so far)
- Front end is a disaster at the moment...

SUNY Innovative Instruction Technology Grant 2013

- $11,500 for programming by outside contractor
- $6,500 in match and in-kind from IDS and Geneseo
The Getting It System Toolkit (GIST) focuses on optimizing workflow by leveraging systems to do more work while reducing the staff time necessary to make informed decisions and process materials.

- Free and open source tools and software
