IDS Logic

Help Us Help Yins

Bill Jones and Michael C. Mulligan
● Rulekit
  ○ What new rules would help you?
  ○ What task do you wish you could automate?
  ○ What task do you always forget to do?
  ○ What task tends to be the most challenging?
• Notes:
What can you do with a Server Addon?

You can:

- search
- route
- flag
- email
- add notes
- update fields
Logic Services
- What 2 systems do you wish were connected?
- What 3 systems do you wish were connected?
- What 2 systems do you wish you didn’t need to use? ...as in some tool made them disappear
- Which button are you fed up with clicking?
Notes:
// ILLiad MainForm Addon
● How do you like to communicate?
  ○ The “Virtual ILL Water Cooler”

● What tasks could be combined?
  ○ To eliminate opening up many TNs over and over

● What tasks blur the workflow lines?
  ○ Borrowing / Doc Del / Lending

● What resources should be readily available?
  ○ Troubleshooting guides, Policies, Contacts, Data
Batch Processing

What actions would be good to batch process?

When would you like to see multiple TNs in one view?
● Notes:
Why is a Dynamic Addon better?

- multiple functions available in the same Addon
- functions change based on Request/Process type
- faster opening one Addon than many Addons
- one central point of Addon maintenance
- Addon automatically updates everytime a TN is loaded
What do you wish the TN form did for you?
What addons would you combine?
How could the TN form be smarter?
Notes:
What actions would group with a click?
Registered event handlers (for Borrowing)

- **BorrowingAcceptItem**
- **BorrowingCheckInItem**
Registered event handlers (for Lending)

- LendingCheckInItem
- LendingCheckOutItem
Notes:
● What far out there idea have you always had for the web request form?
● What do you always wish it had?
● What do you always wish it did?
AutoSuggest:

Possibilities of integrating APIs, JavaScript
Webpage changes through CSS Deployment Tool
